## OVERVIEW:

Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China. The World Health Organization declared COVID-19 a global pandemic on March 11, 2020.

# Buckeye Guide to Social Distancing

## Buckeye Guide to Social Distancing 6 FEET APART EQUALS...

For more information go to [coronavirus.ohio.gov](https://coronavirus.ohio.gov)

*Stay connected with family and friends while social distancing. Send a letter, make a phone call, get on a video chat, send a text. We're all in this together.*

**#InThisTogetherOhio**

Social distancing, also called “physical distancing,” means keeping space between yourself and other people outside of your home. To practice social or physical distancing:

- Stay at least 6 feet (2 meters) from other people
- Do not gather in groups
- Stay out of crowded places and avoid mass gatherings

In addition to everyday steps to prevent COVID-19, keeping space between you and others is one of the best tools we have to avoid being exposed to this virus and slowing its spread locally and across the country and world.

When COVID-19 is spreading in your area, everyone should limit close contact with individuals outside your household in indoor and outdoor spaces. Since people can spread the virus before they know they are sick, it is important to stay away from others when possible, even if you have no symptoms. Social distancing is especially important for people who are at higher risk of getting very sick.
