

Covid19 Summary for Holmes County: October 4-10, 2020

Summary:

Public health surveillance data indicate Corona Virus Disease 2019 (Covid19) activity in Holmes County increased at a faster pace than previous week. Forty-four new cases were reported to the Holmes County General Health District during the week which brings the total to 464 cases. Most of the cases are 20-69 years of age (74%) and case counts are evenly split between males and females. Seventeen zip codes in the county have one or more cases with approximately one-half of the cases residing in the 44654 zip code. The total number of hospitalized cases is 46. Most of the hospitalized cases are male (73%) and 60 years of age or older (79%). Ten Holmes County residents have died of complications from Covid19. Most of the deaths have occurred among males (90%) and those 80 years of age or older (80%). 384 cases have met the criteria for recovered.

Dashboard:

Indicator	Current Week	Previous Week	Trend (# of weeks)	Total to Date
Number of New Cases Reported ¹	44	28	 3	464
Number of Hospitalized Cases ¹	4	1	 1	46
Number of deaths: ²	0	1	 1	10
Number of Recovered Cases ³				384

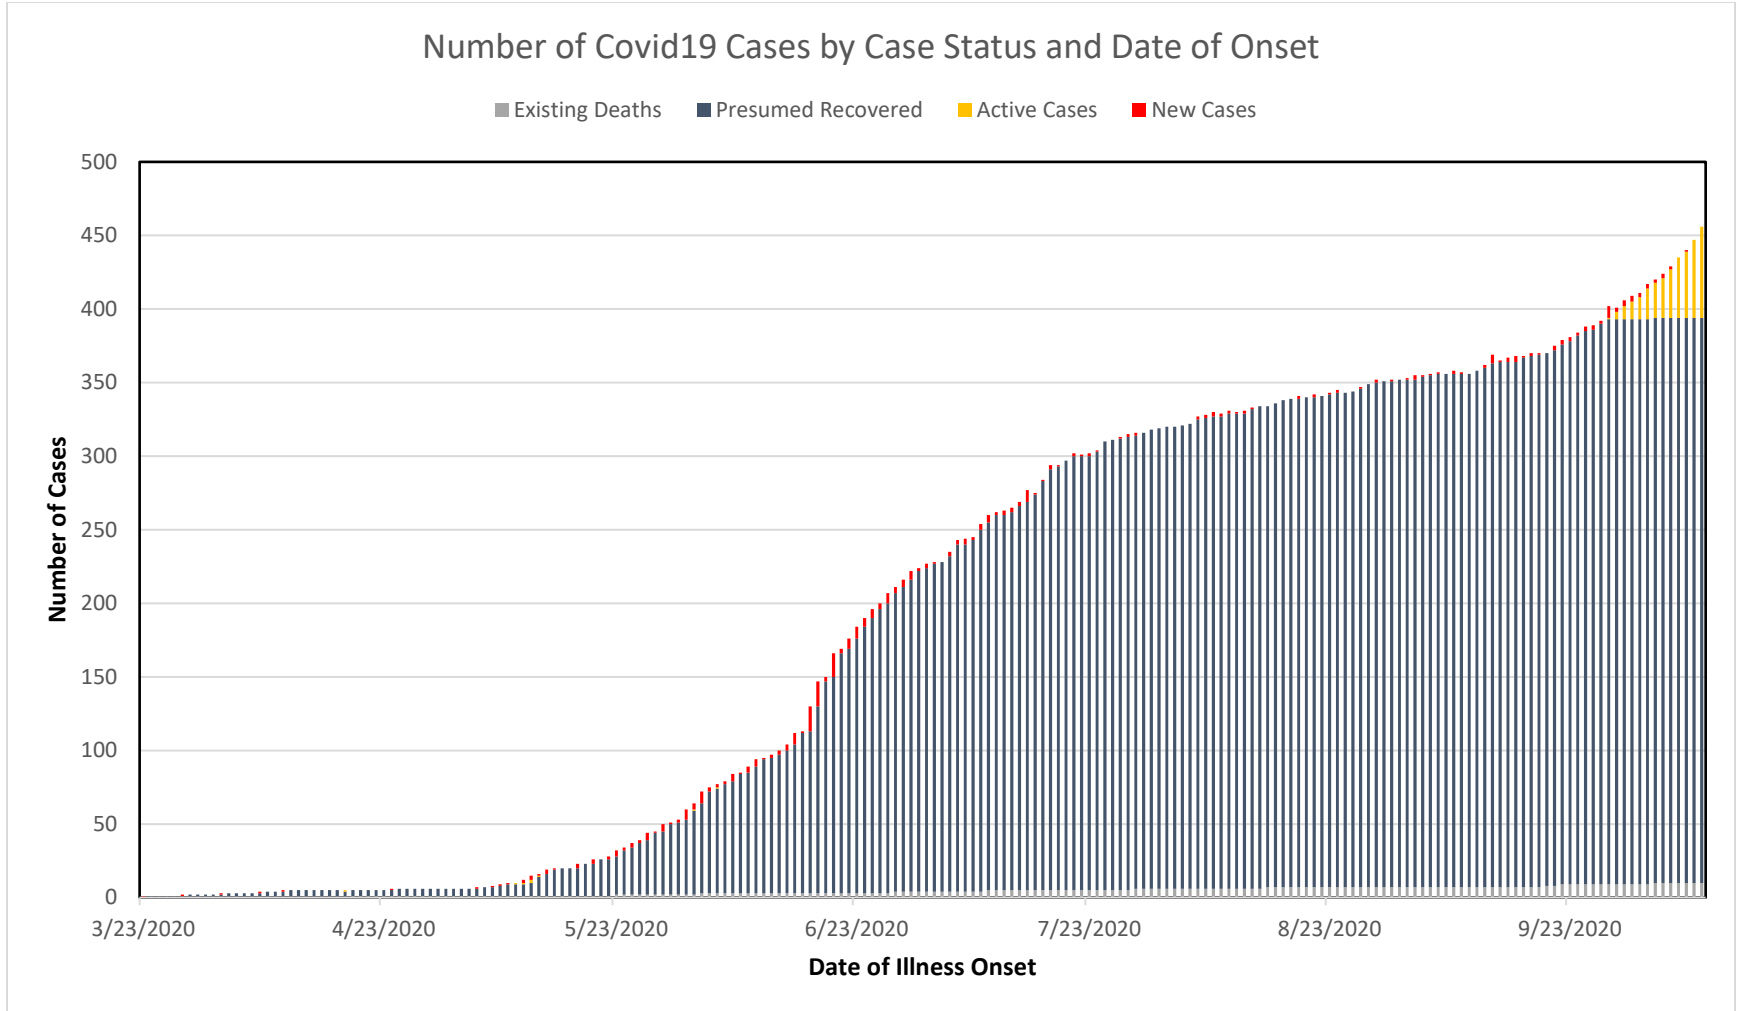

Number of New Covid19 Cases by Date Reported to the Health District:

Holmes County is currently experiencing a second spike in the number of new cases. The 7-day average for the number of new cases reported is now over 6 cases per day.

Number of Covid19 Cases by Case Status and Date:

99 cases have been reported to the Holmes County General Health District in the last 4 weeks.

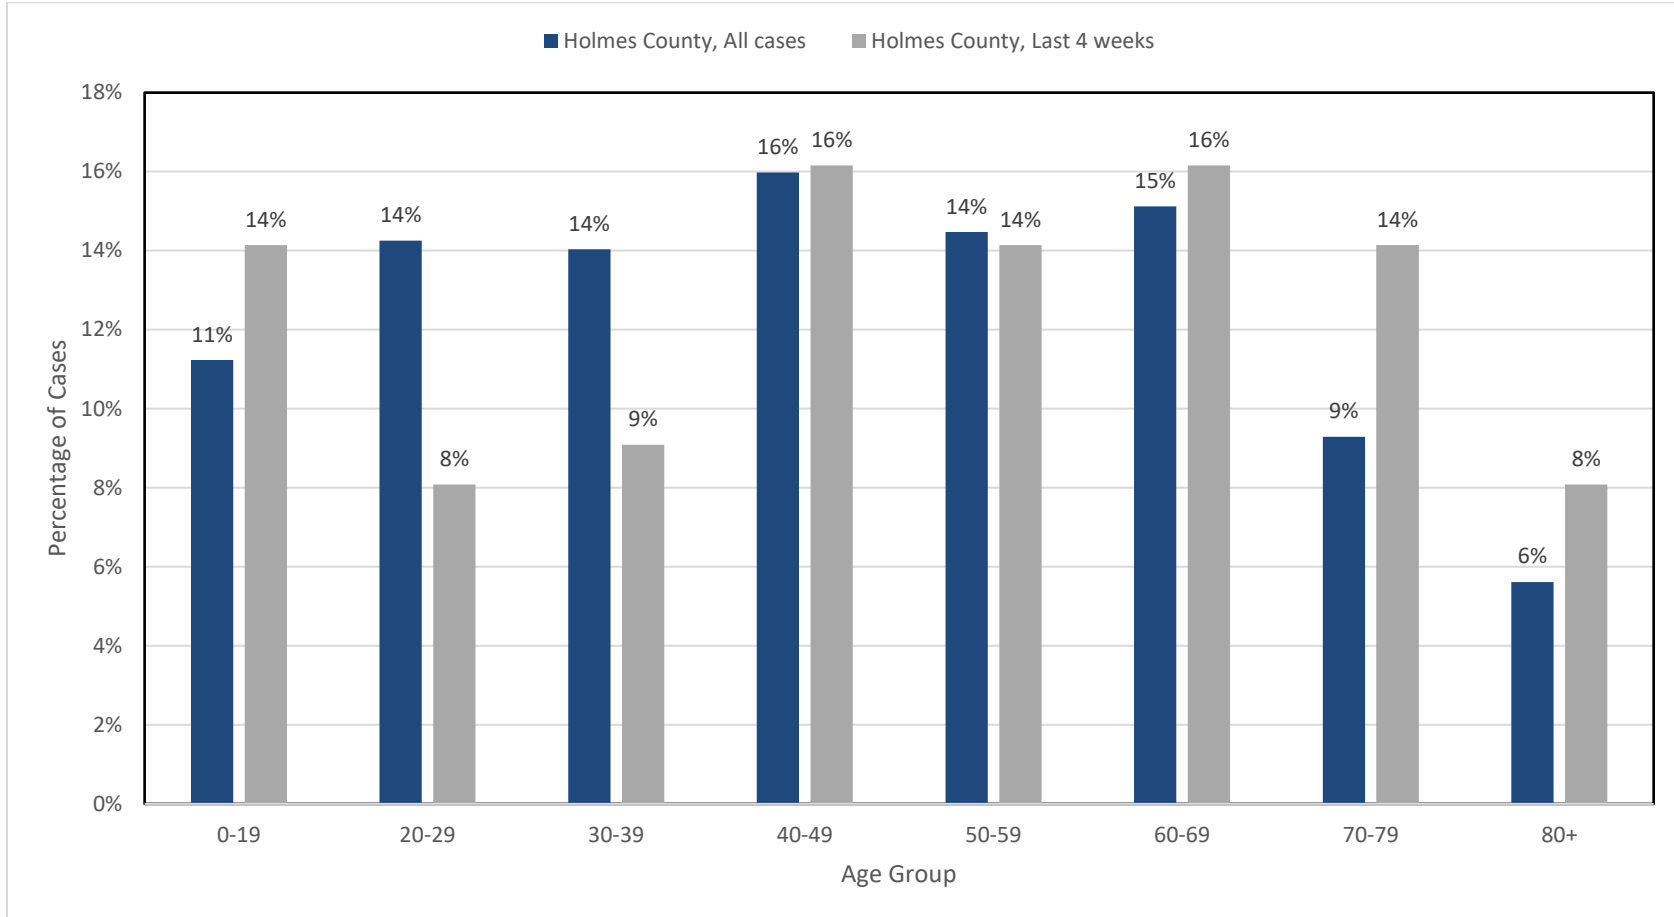

Percentage of Covid19 Cases by Sex:

During the las 4 weeks, the percentage of reported cases is evenly split between males and females. This pattern is consistent with the percentage of cases reported by sex since the beginning of the pandemic.

Covid19 Deaths Reported by Zip Code:

6 out of the 10 Covid19 deaths have been residents of the 44654 zip code.

Data Sources:

1. **Ohio Disease Reporting System (ODRS):** Information on cases of communicable diseases reportable under Ohio Revised Code are housed and maintained by the Ohio Disease Reporting System (ODRS). Corona Virus Disease 2019 (Covid19) is a reportable condition under Ohio Revised Code. Health Care Providers are required to immediately notify their local public health department of Covid19 cases for follow-up. Cases with a classification status of confirmed or probable are included in this report. Confirmed cases are defined as patients that receive a positive laboratory test performed for Covid19. Probable cases must meet clinical criteria and epidemiologic

evidence without confirmatory laboratory testing OR meet presumptive laboratory evidence and either clinical criteria or epidemiologic evidence.

2. **Office of Vital Statistics:** The Holmes County General Health District Office of Vital Statistics receives reports on the causes of death that occur within the county. Covid19 deaths were included in this report if they were listed as the immediate or underlying cause of death on the death certificate.
3. **Definition of Recovered:** The number of cases minus the number of deaths minus the number of cases with illness onset in the last 21 days.
