

Weekly Covid-19 Summary

December 20-26, 2020

Summary:

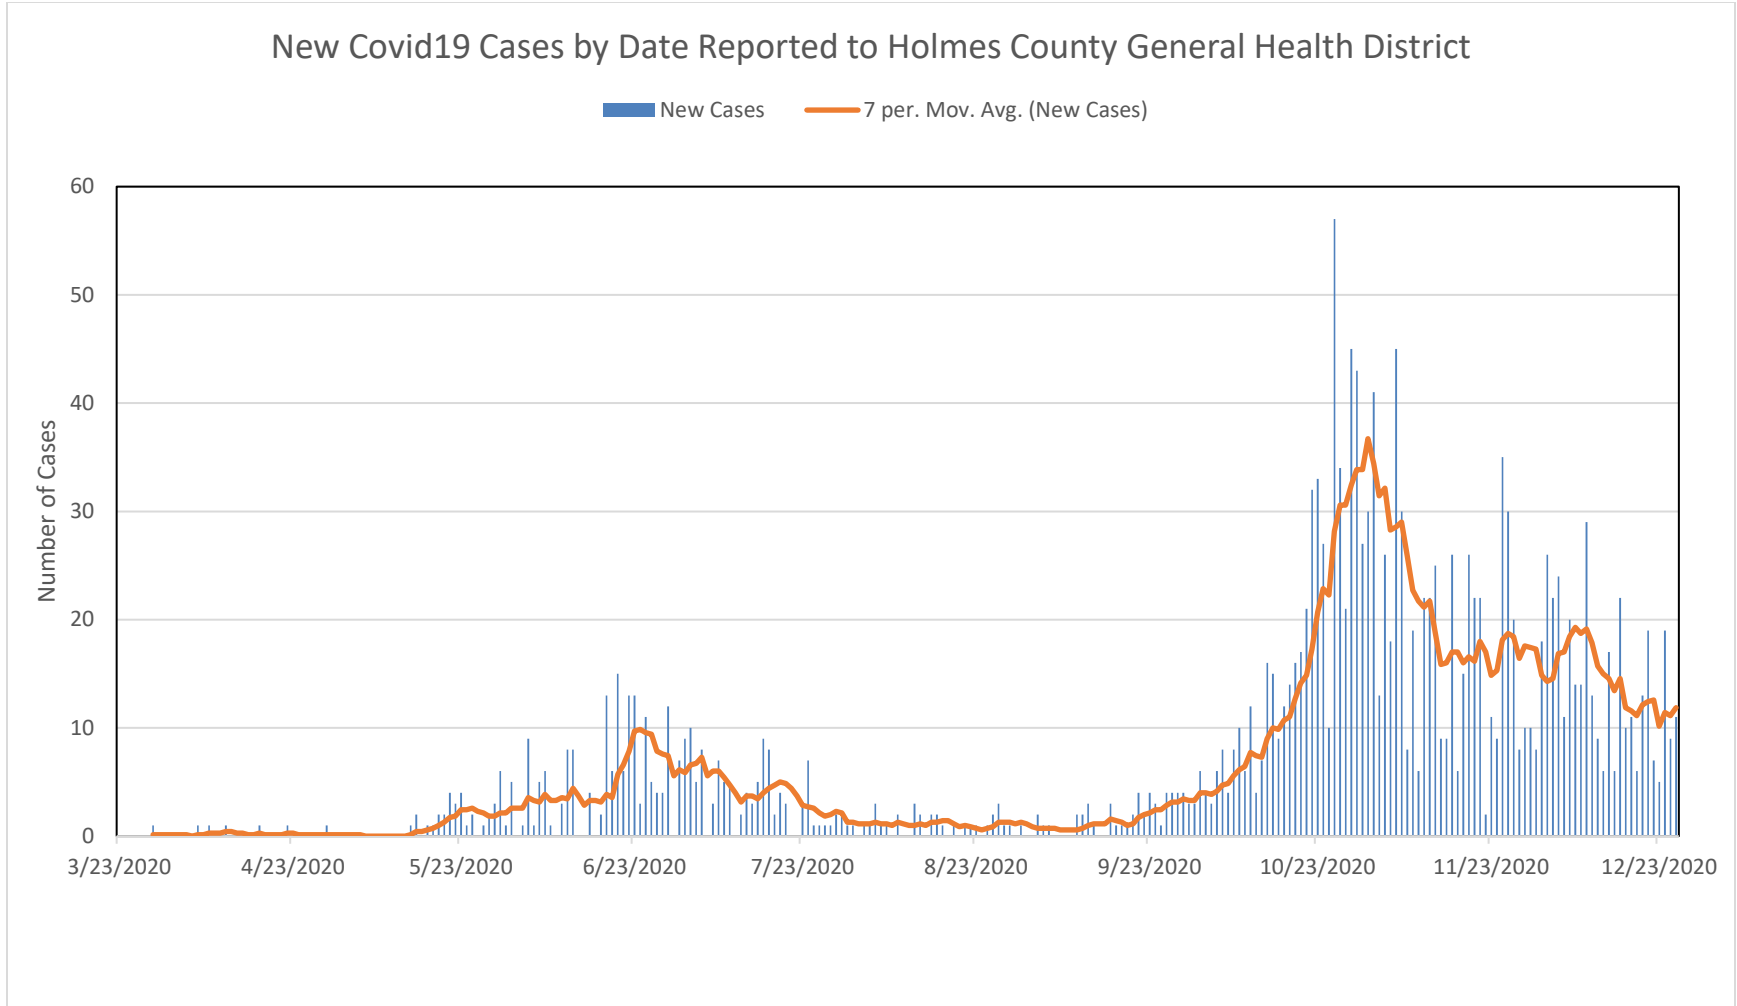

Public health surveillance data indicate Corona Virus Disease 2019 (Covid19) activity in Holmes County increased at a slightly faster pace than the previous week. The cumulative number of cases reported to the Holmes County General Health District is 1,896 with 380 cases reported in the last 4 weeks. During the last 4 weeks, most of the cases are ages 20-69 (67%) and case counts are slightly higher among males (51%). The zip codes with the highest case rates during the last 4 weeks are Nashville (44661), Berlin (44610), and Walnut Creek (44687). The cumulative number of hospitalized cases is 198 with 29 hospitalizations admitted during the last 4 weeks. During the last 4 weeks, most of the hospitalized cases are male (79%) and 60 years of age or older (72%). 66 Holmes County residents have died from Covid19 with 14 deaths occurring in the last 4 weeks. All of the deaths in the last 4 weeks have been 50 years of age or older.

Dashboard:

Indicator	Current Week	Previous Week	Trend (# of weeks)	Total to Date
Number of New Cases Reported ¹	83	78	 1	1,896
Number of Hospitalized Cases ¹	3	2	 1	198
Number of deaths: ²	2	5	 2	66
Number of Recovered Cases ³				1,648
Number of Active Cases				154

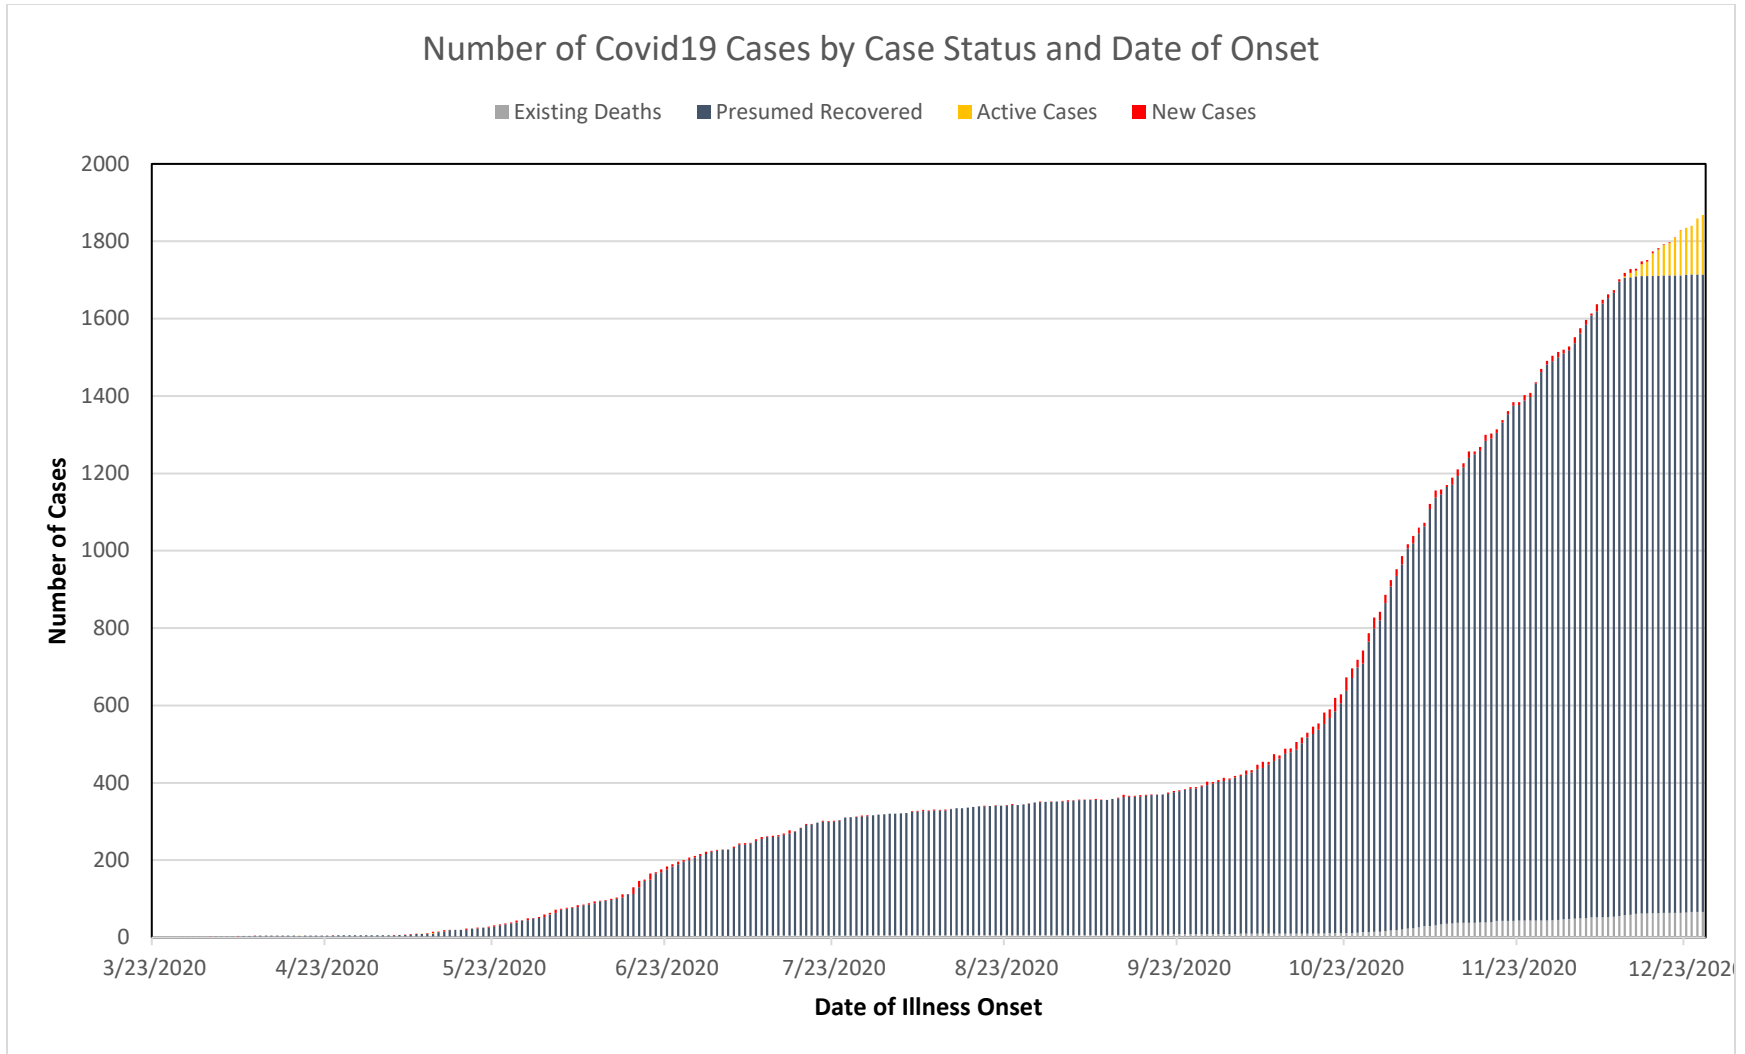

Number of New Covid19 Cases by Date Reported to the Health District:

The 7-day average for the number of new cases reported is 11.

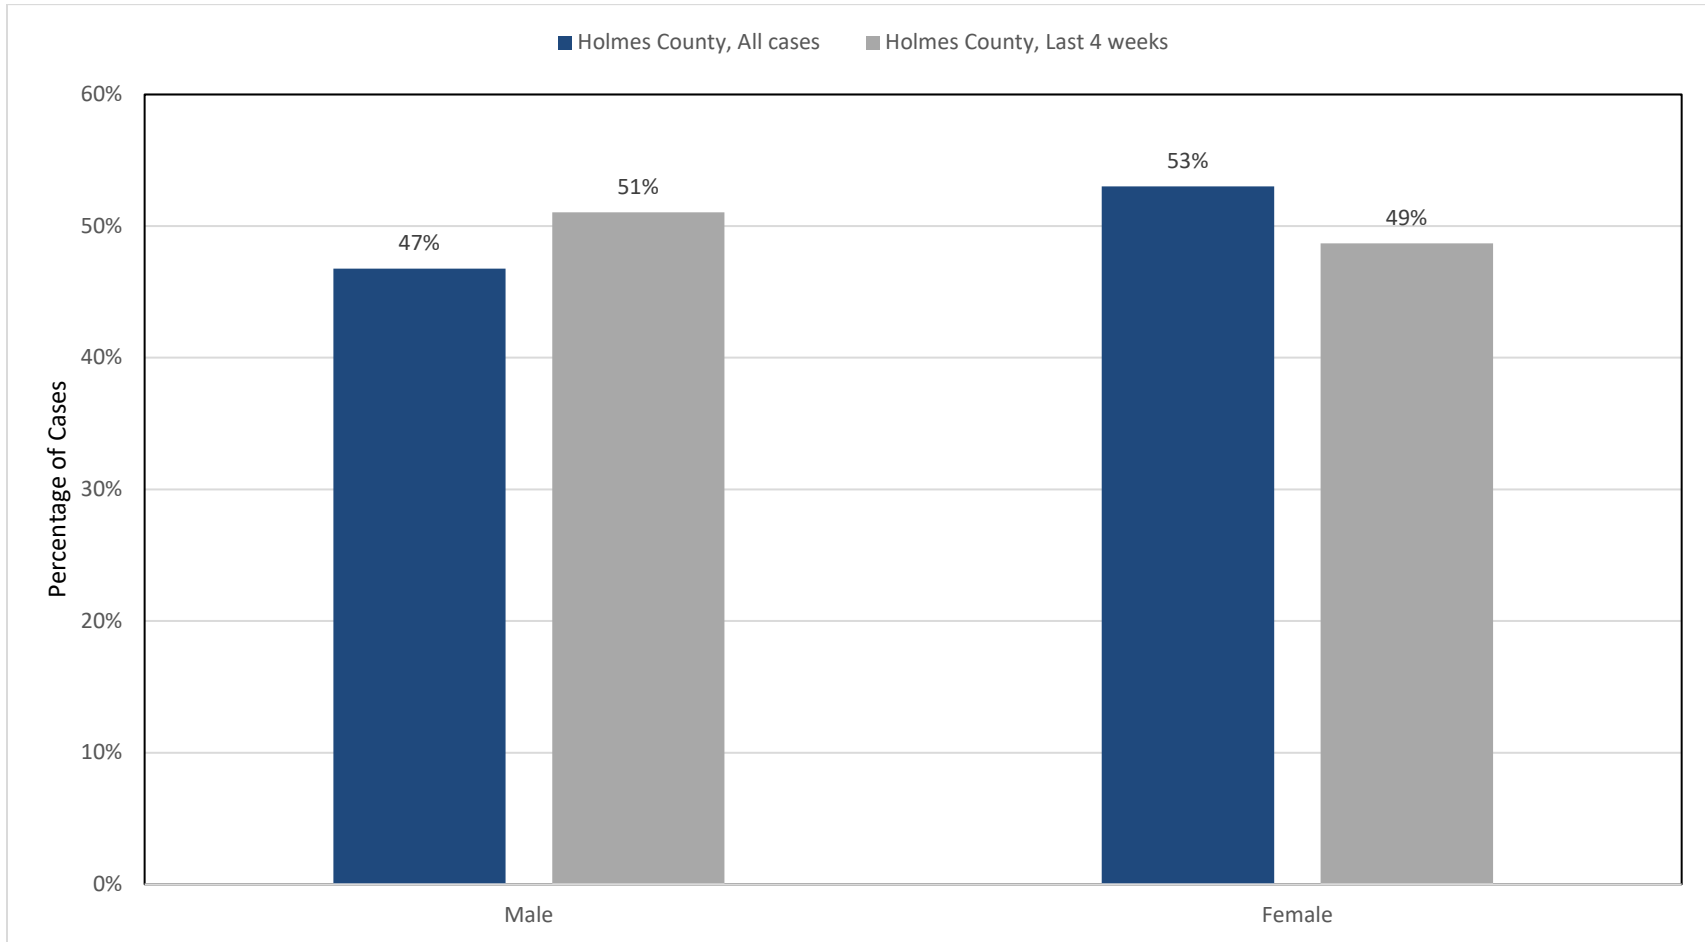

Number of Covid19 Cases by Case Status and Date:

380 cases have been reported to the Holmes County General Health District in the last 4 weeks.

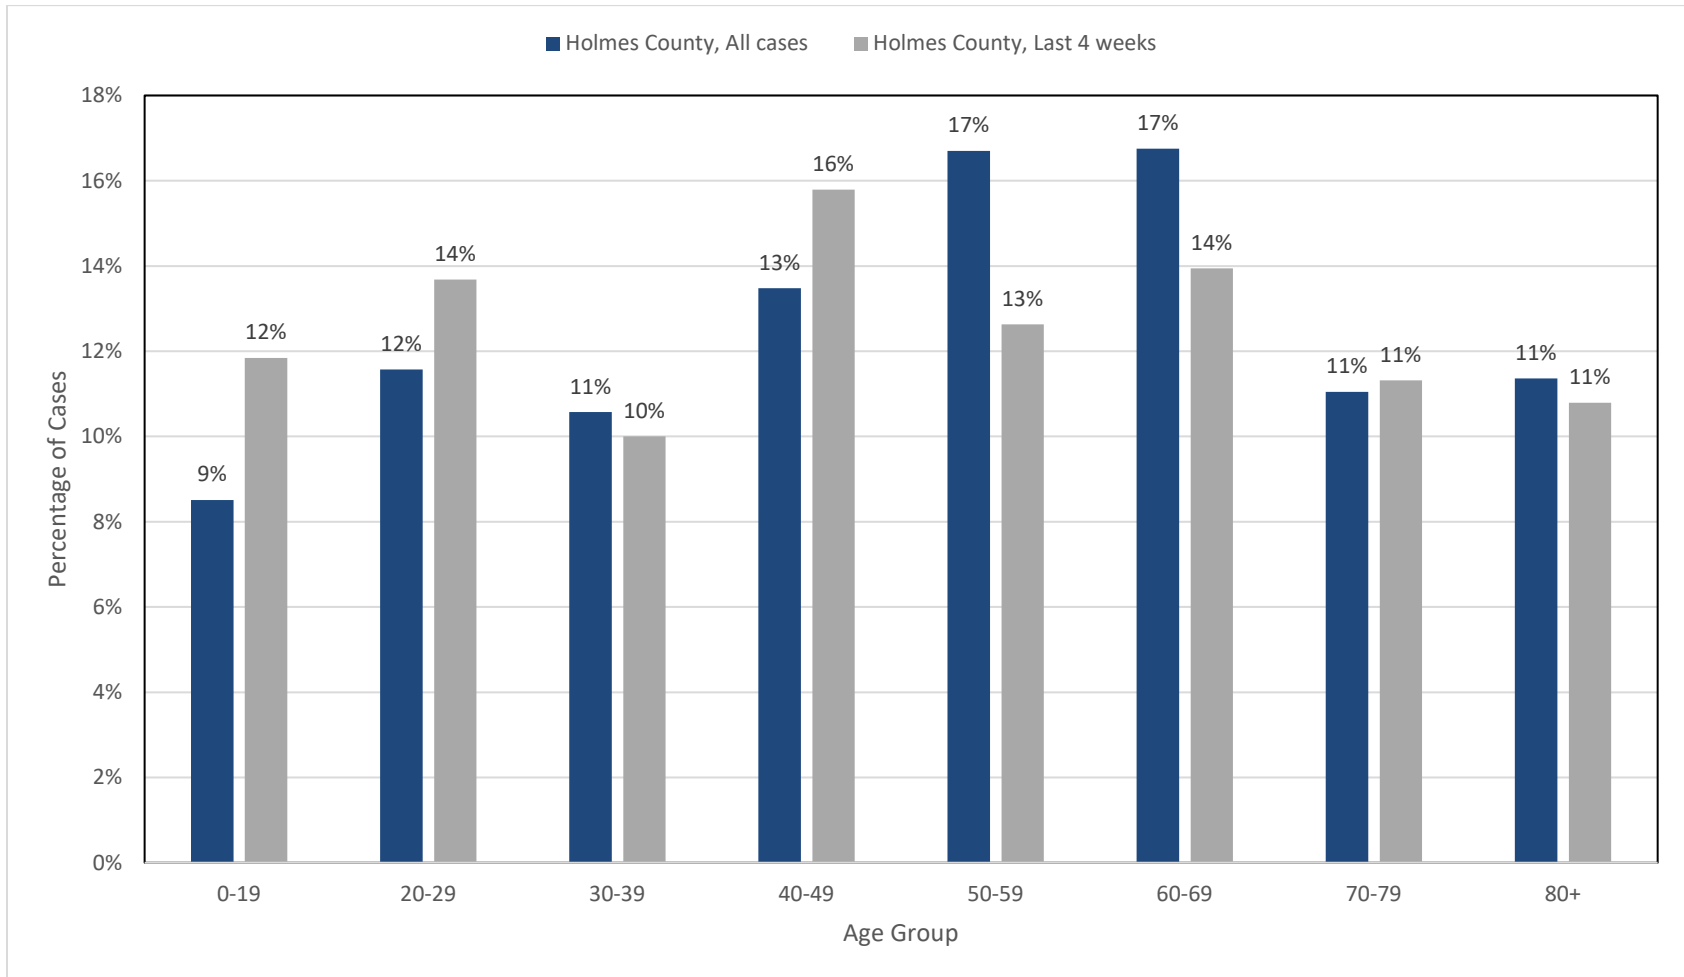

Percentage of Covid19 Cases by Sex:

During the last 4 weeks, the percentage of reported cases is slightly higher among males (51%) compared to females (49%). This pattern is not consistent with the percentage of cases reported by sex since the beginning of the pandemic.

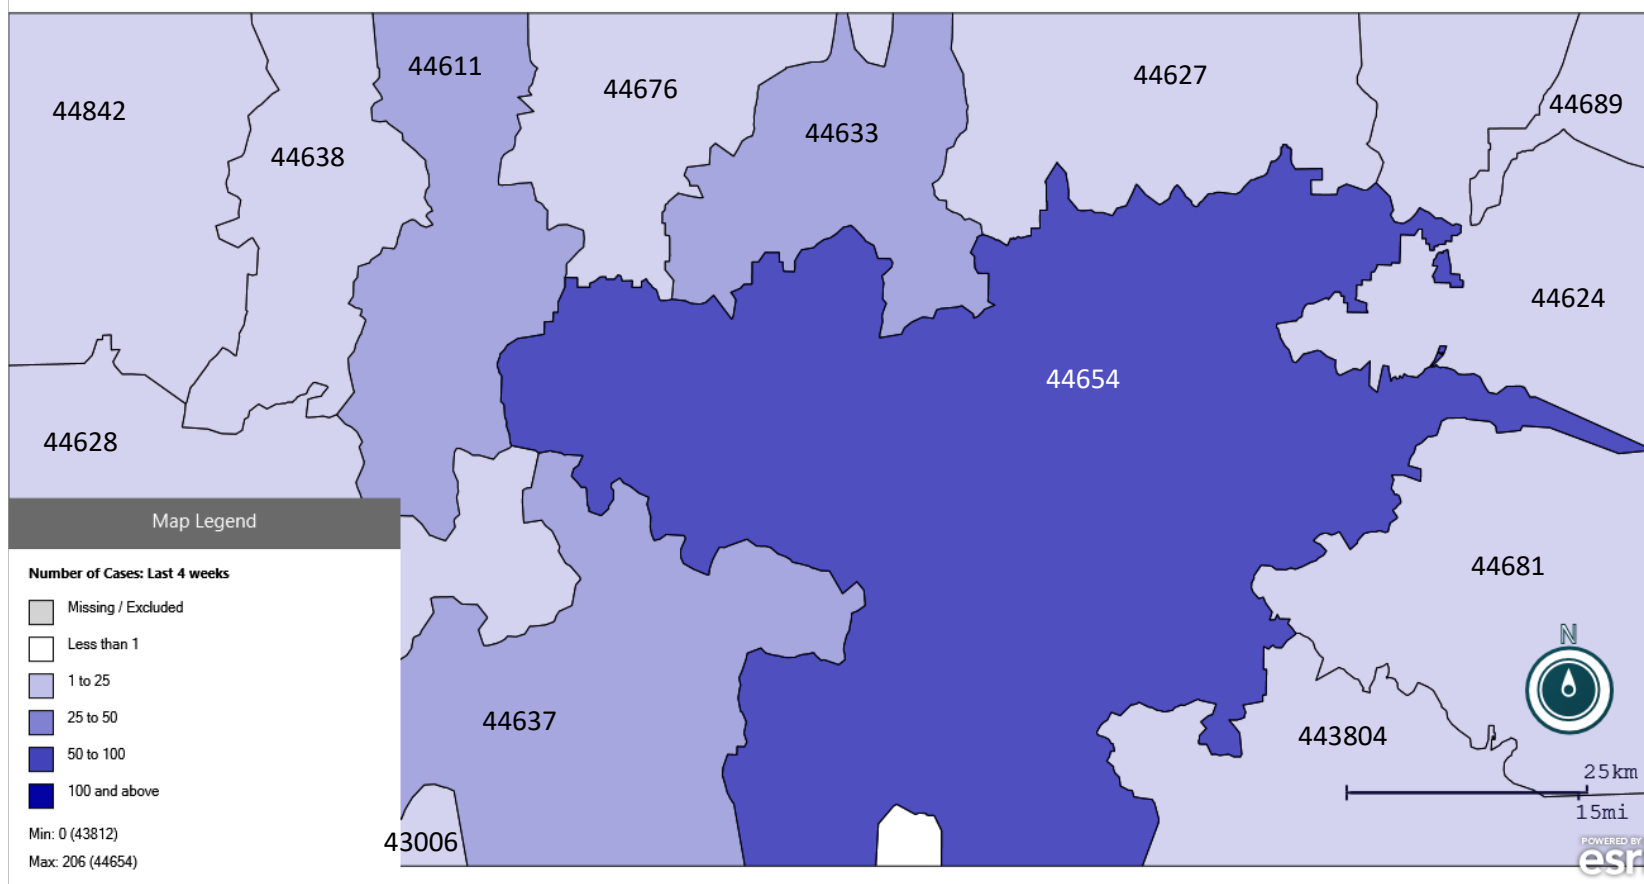

Percentage of Covid19 Cases by Age Group:

During the last 4 weeks, the highest percentages of reported cases were among individuals ages 40-49 (16%), 60-69 (14%), and 20-29 (14%). This pattern is younger than the age distribution of cases since the beginning of the pandemic.

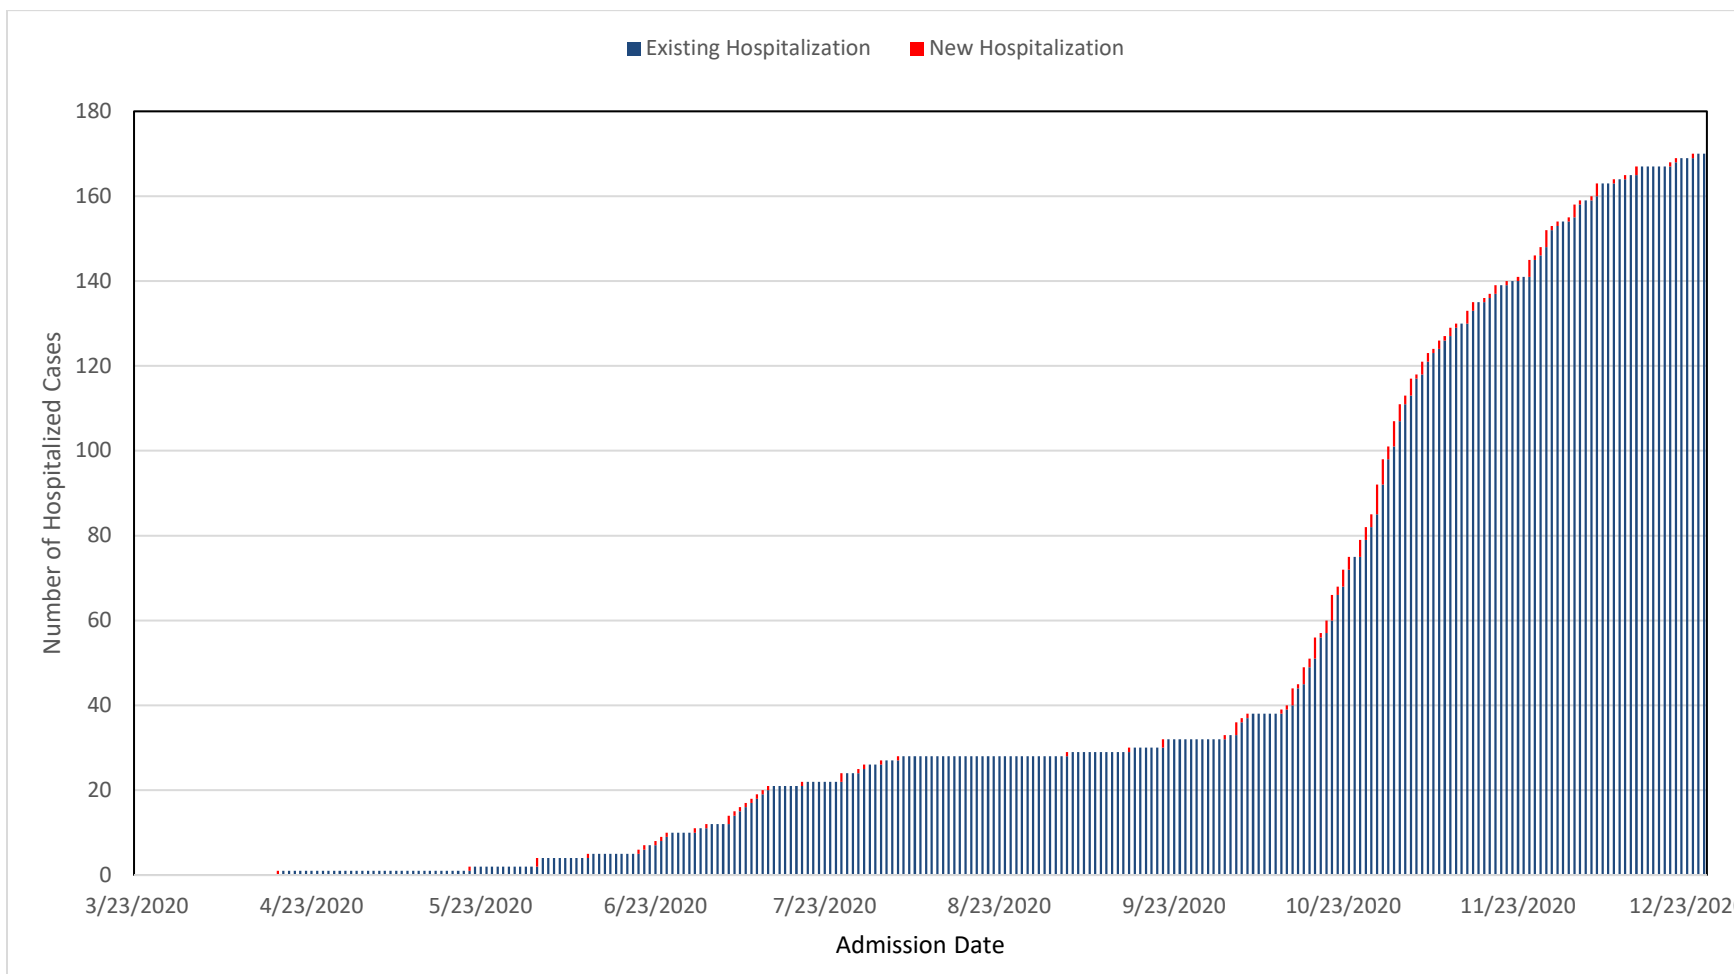

Covid19 Cases by Zip Code (Last 4 weeks):

During the last 4 weeks, the highest number of reported cases are residents of 44654 (206 cases), 44637 (34 cases), 44633 (32 cases), and 44611 (25 cases) (map below). The highest case rates were found in the 44661 (4,094 per 100,000), 44687 (1,375 per 100,000), and 44610 (1,869 per 100,000) (map not shown).

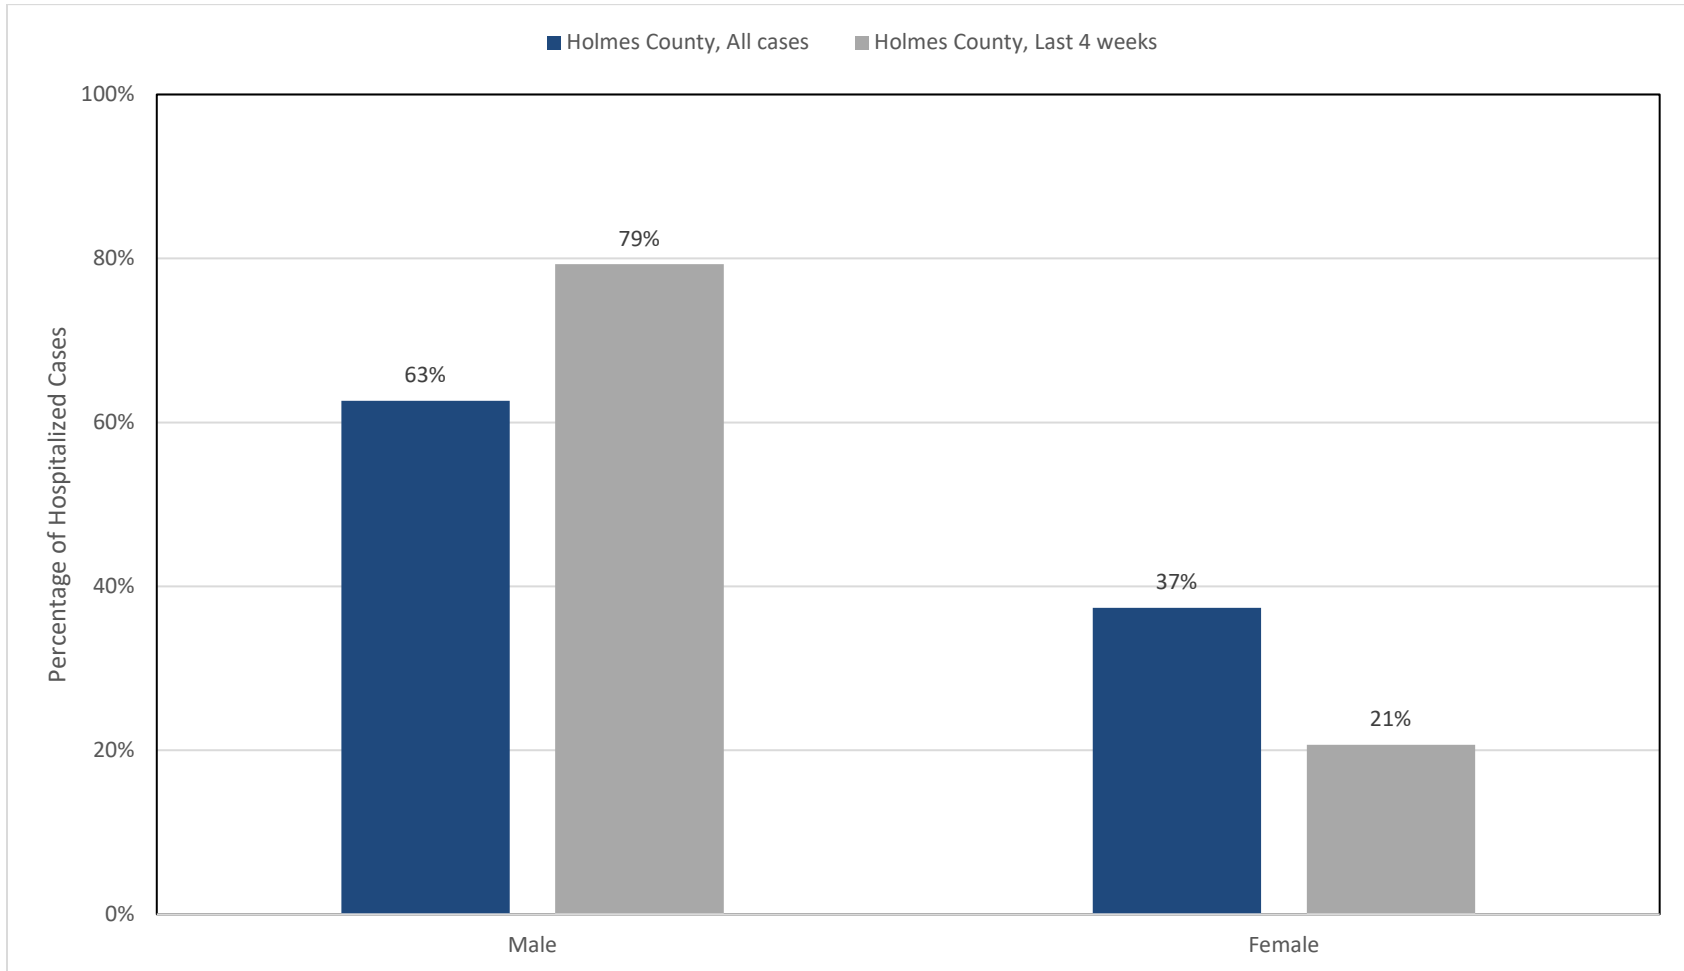

Number of Hospitalized Covid19 Cases Reported by Day:

29 hospitalizations have been admitted in the last 4 weeks. 2 out of the 29 have been admitted to an intensive care unit. The chart below excludes hospitalizations with unknown admission date.

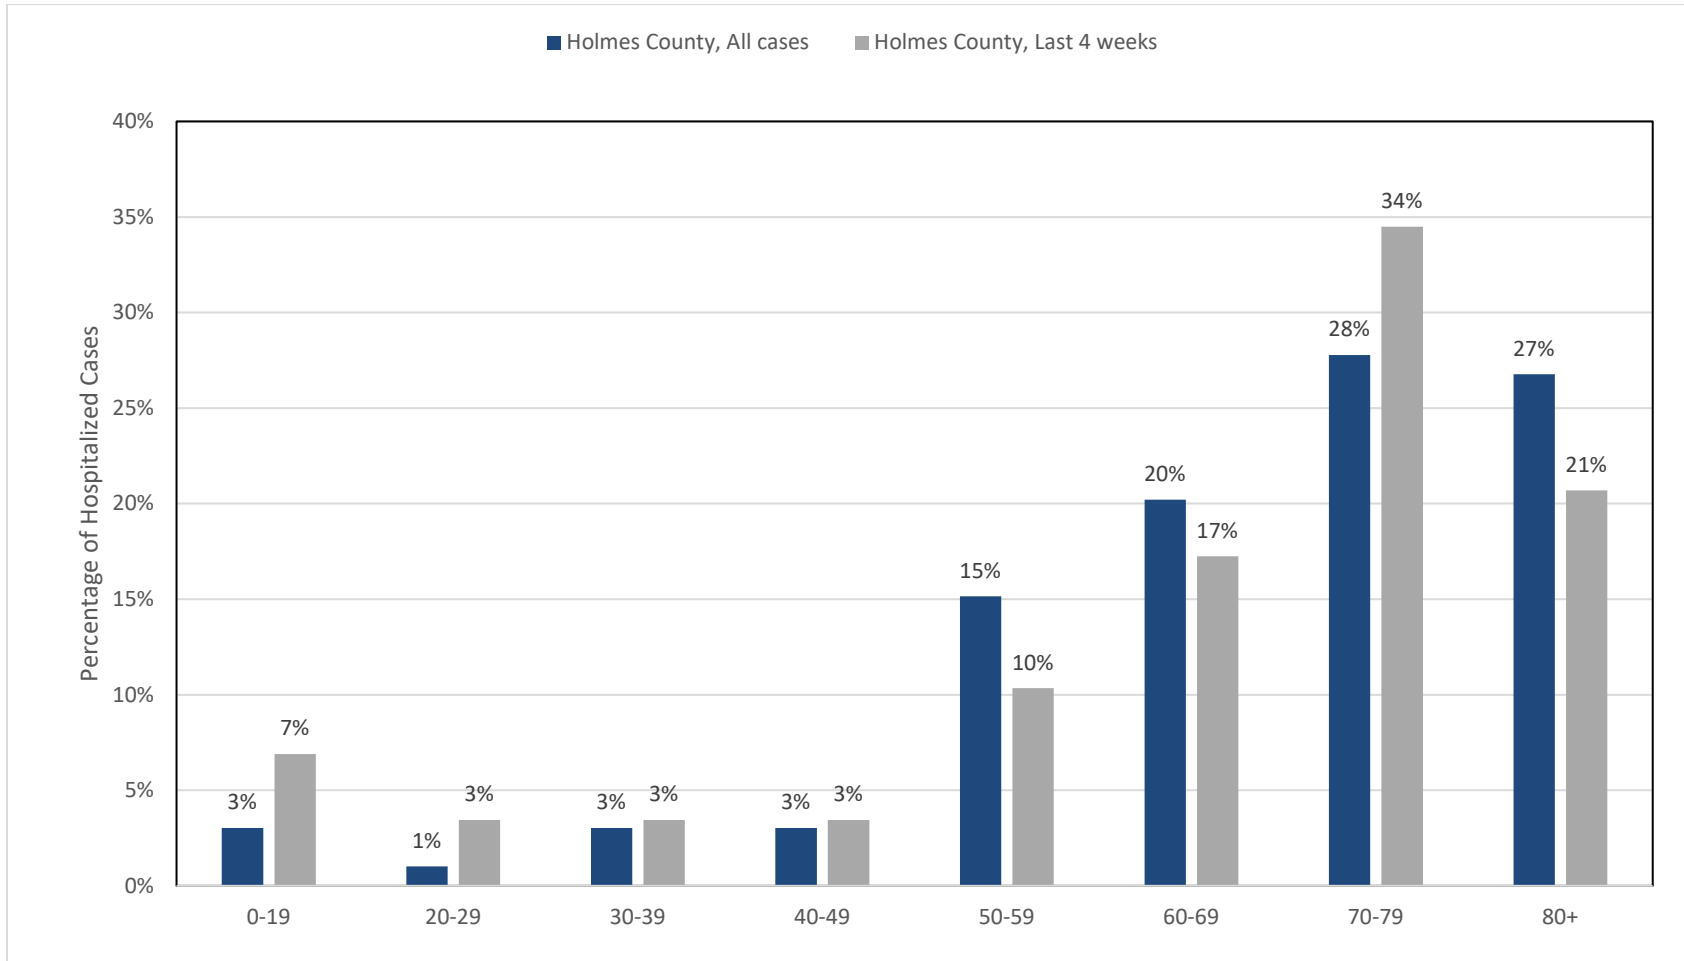

Covid19 Hospitalizations by Sex:

During the last 4 weeks, 79% of hospitalized cases were male and 21% were female. This pattern is higher than the percentage of hospitalized cases among males since the beginning of the pandemic.

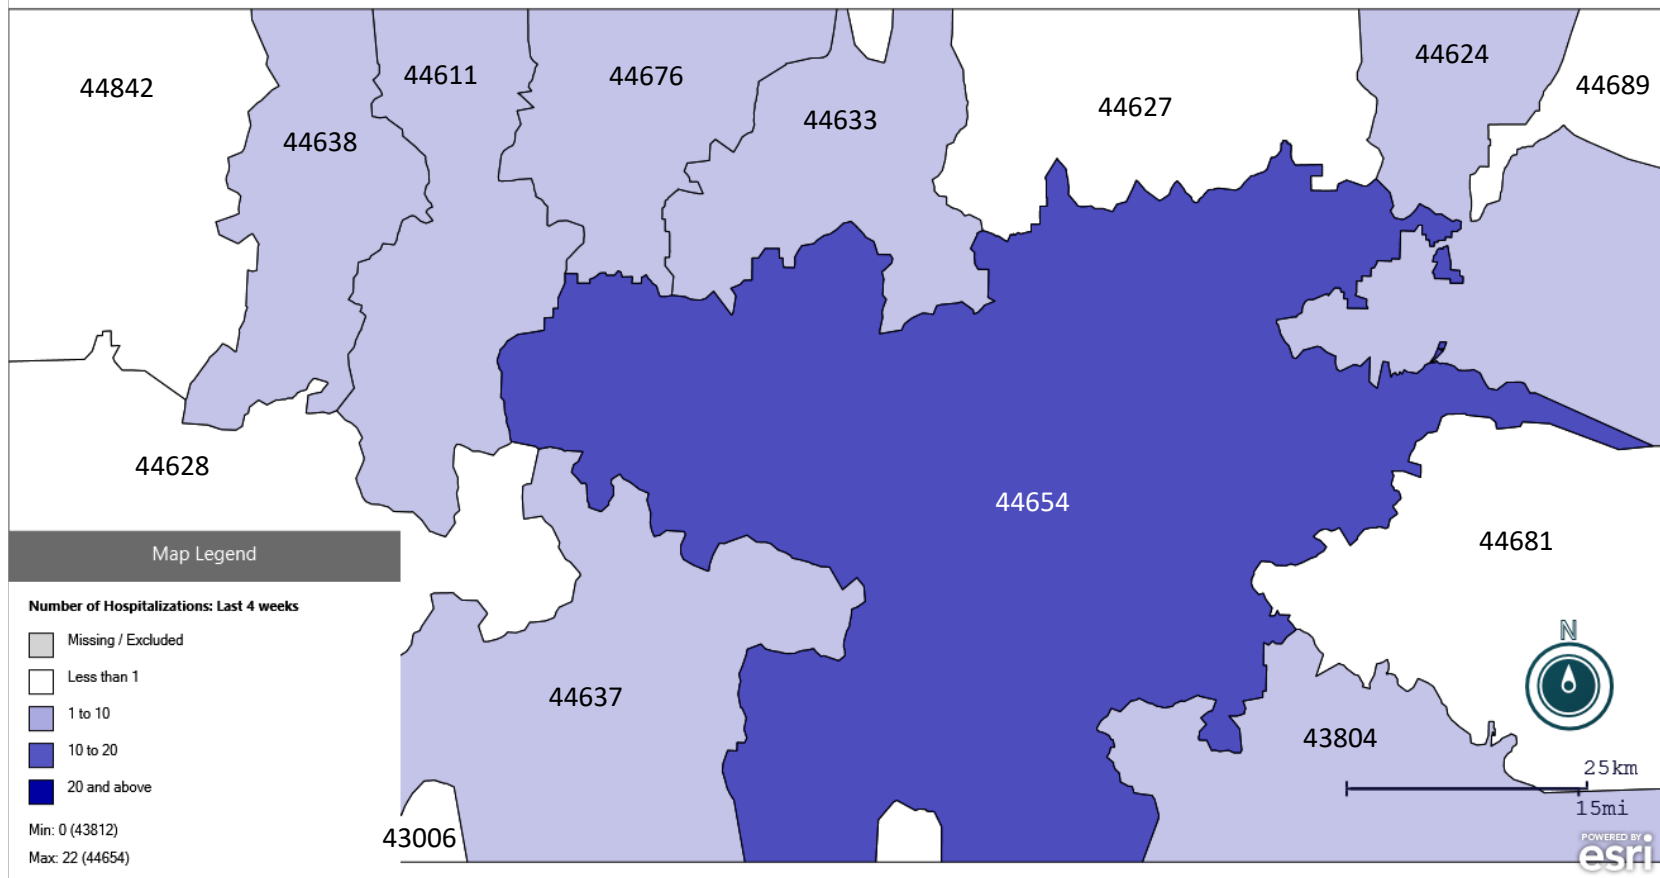

Covid19 Hospitalizations by Age Group:

During the last 4 weeks, 72% of hospitalizations have occurred among those 60 or older. This pattern is slightly younger than the age distribution of hospitalizations since the beginning of the pandemic.

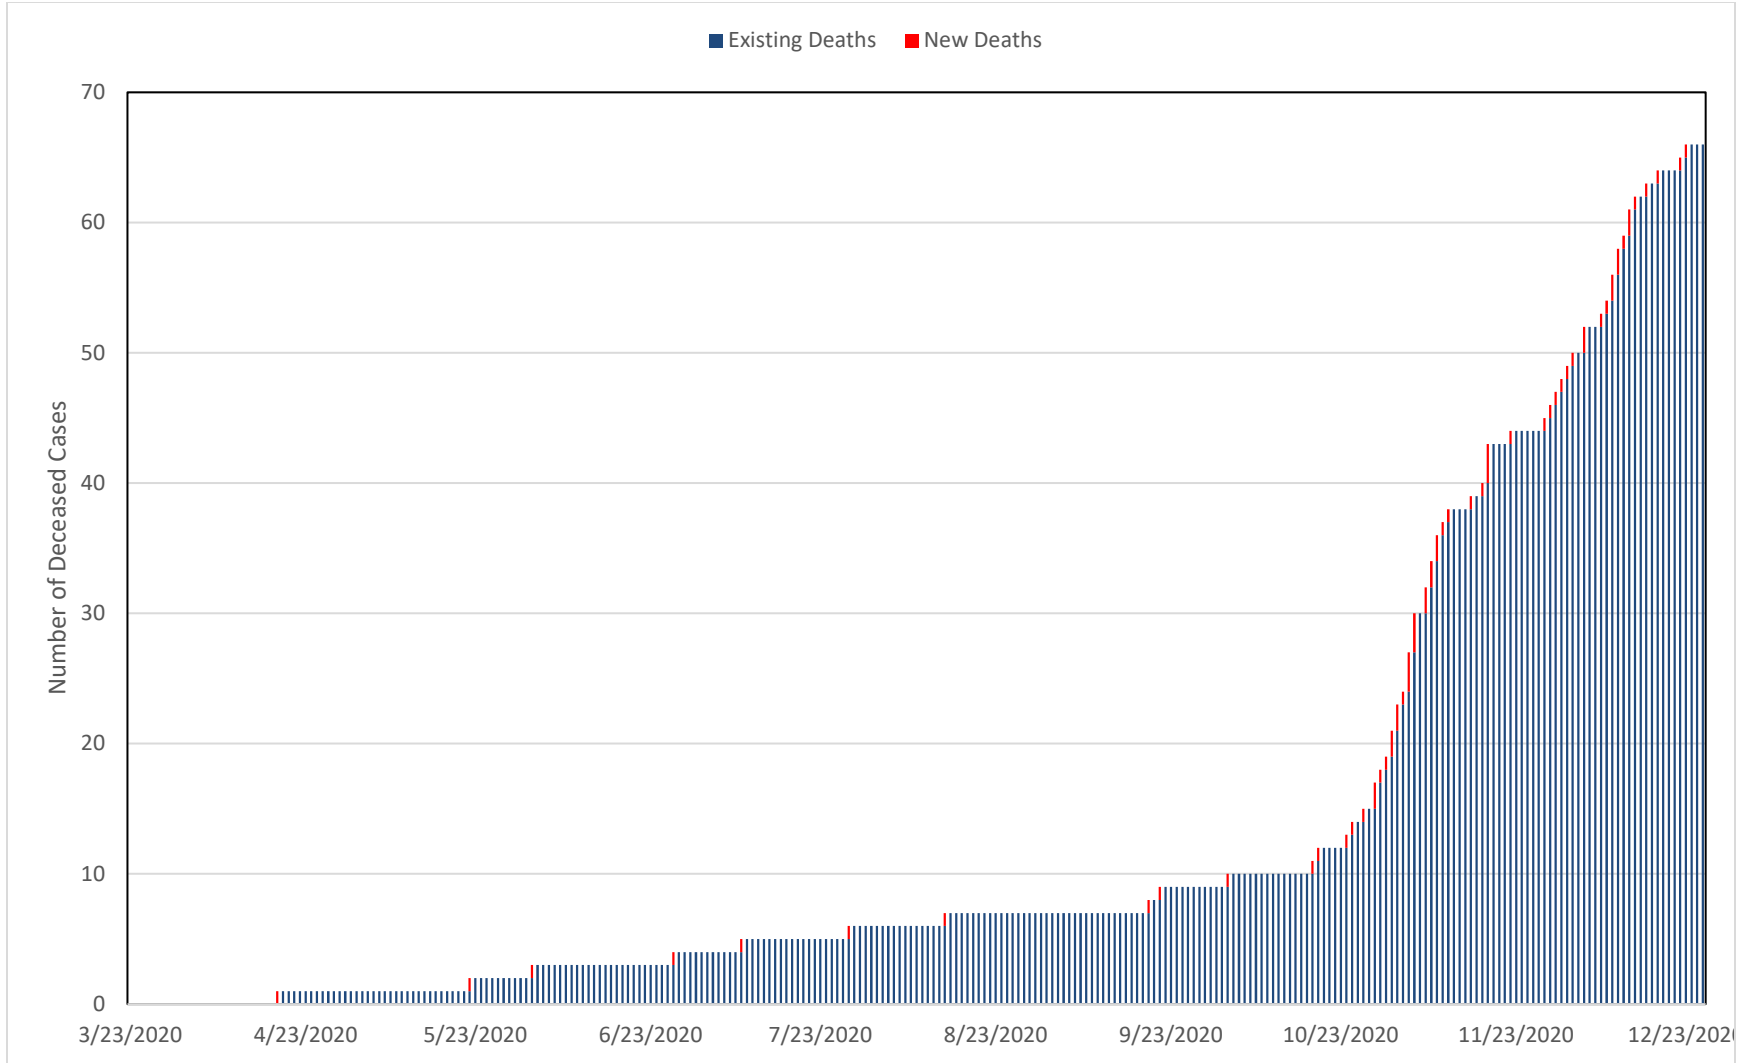

Covid19 Hospitalizations by Zip Code (Last 4 weeks):

During the last 4 weeks, 22 out of the 29 hospitalizations were residents of the 44654 zip code. No other zip code had more than 1 hospitalizations (map below). The highest hospitalization rate was found in the 44654 (105 per 100,000) zip codes (map not shown).

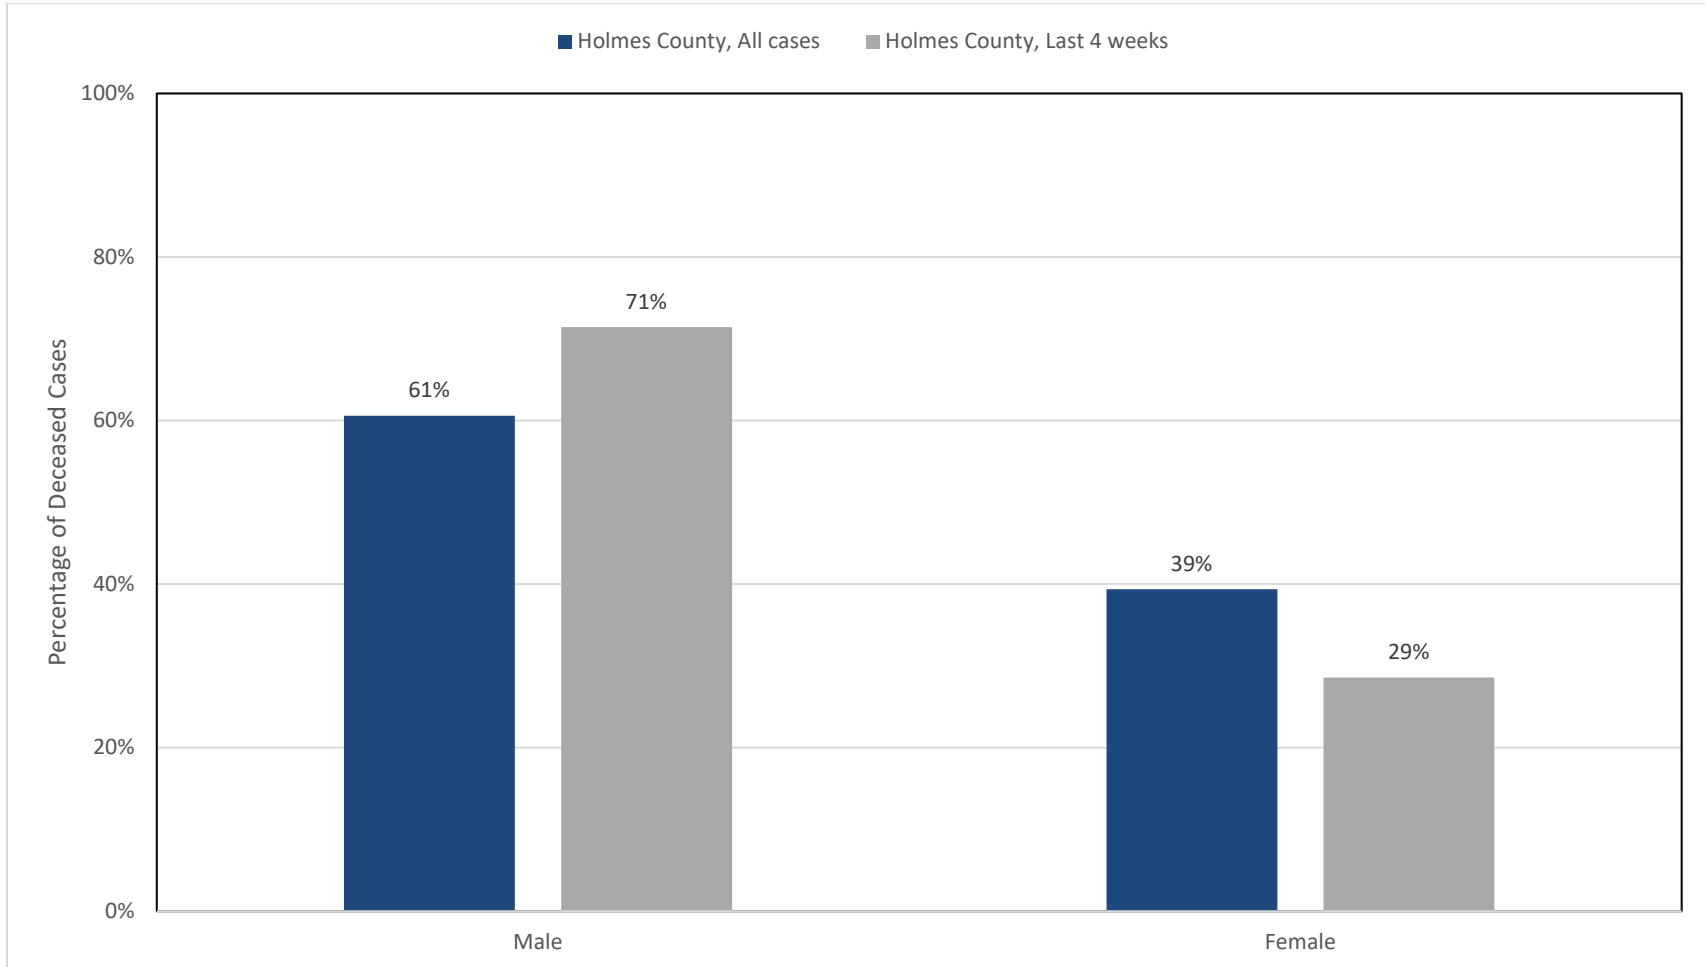

Covid19 Deaths by Date of Death:

14 deaths have been reported in the last 4 weeks.

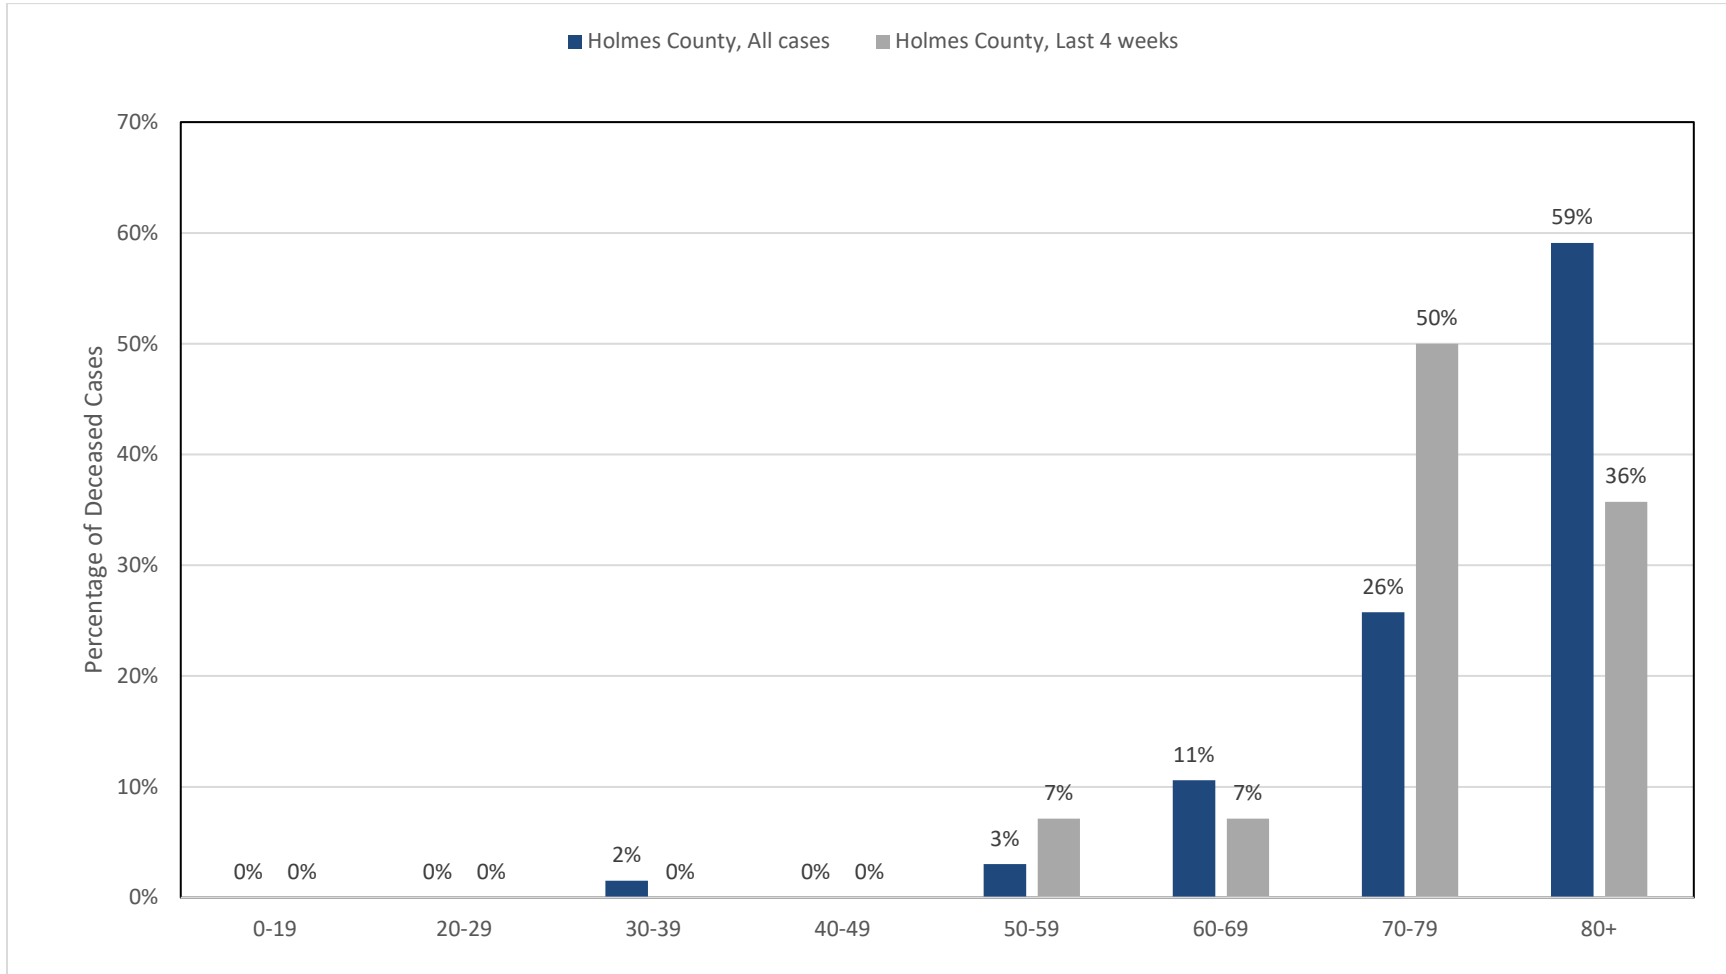

Covid19 Deaths Reported by Sex:

During the last 4 weeks, 71% of decedents were male. The percentage of male decedents is higher than the cumulative percentage of male decedents since the beginning of the pandemic.

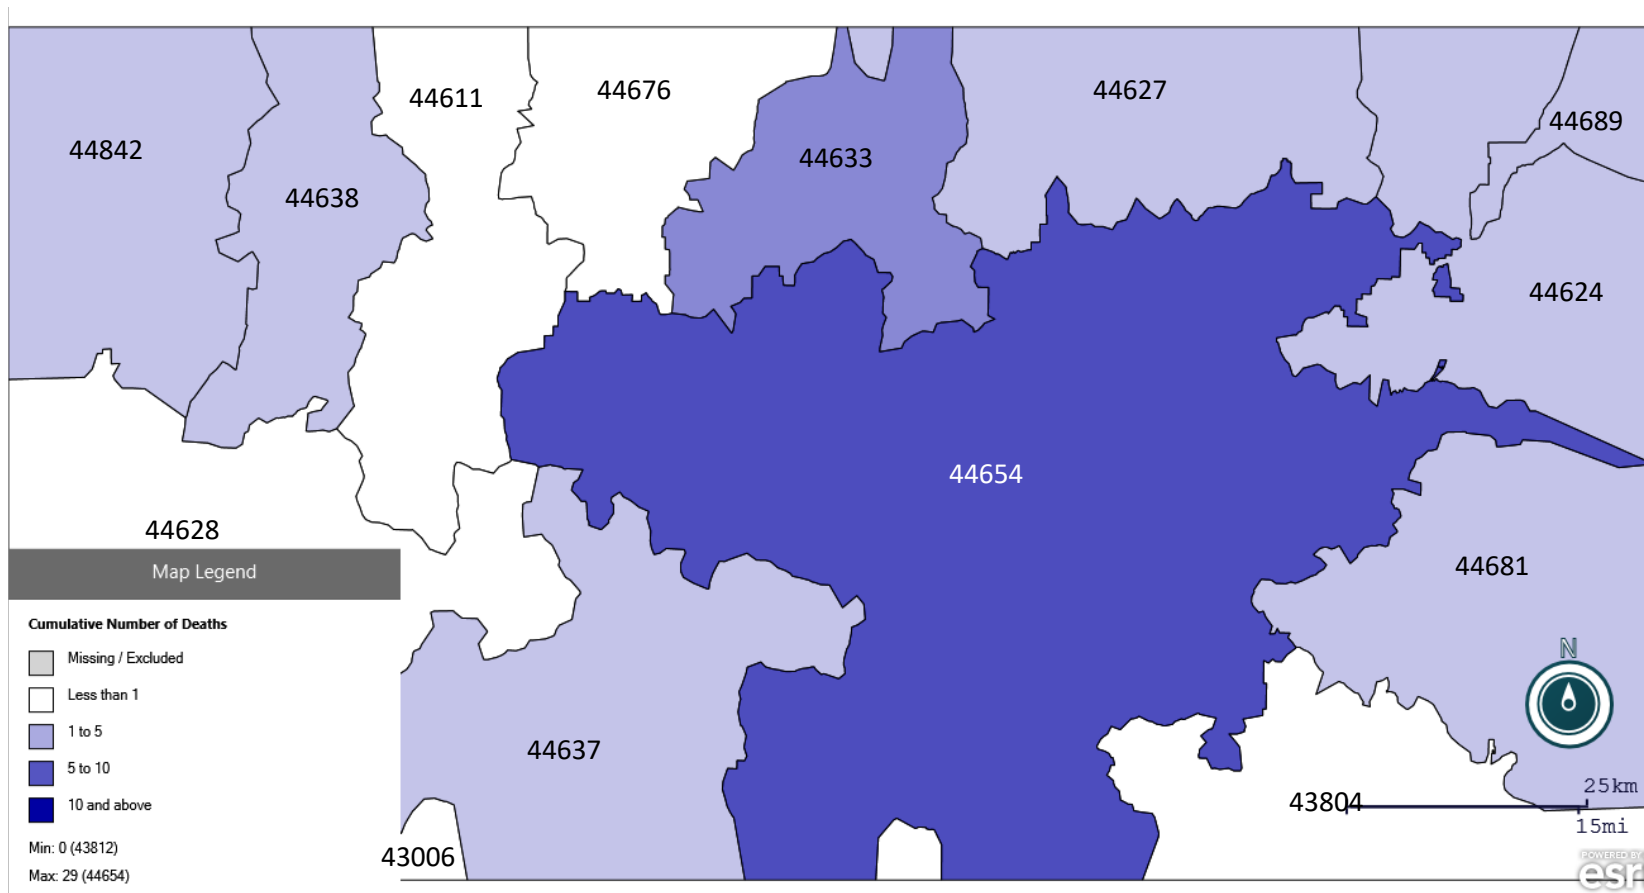

Covid19 Deaths Reported by Age:

During the last 4 weeks, 86% of the deaths occurred among cases age 70 or older. This pattern is similar to the age distribution of deceased cases since the beginning of the pandemic.

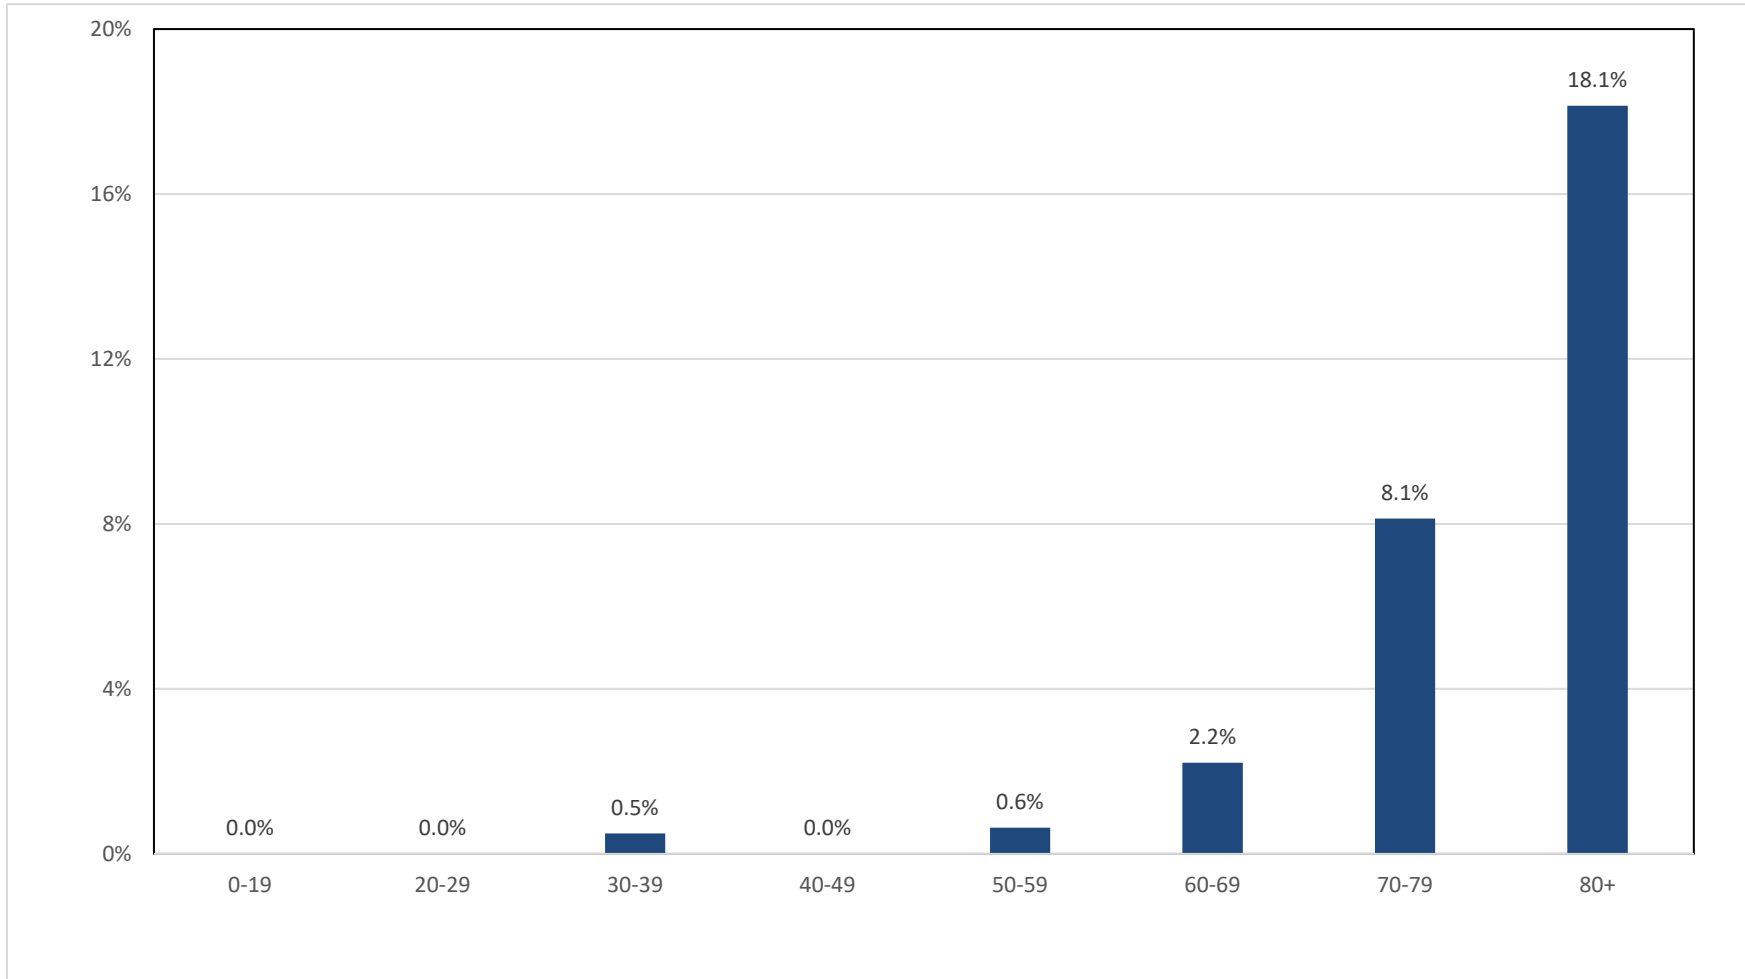

Covid19 Deaths Reported by Zip Code (Cumulative):

Since the beginning of the pandemic, 29 residents from the 44654 zip code and 21 residents from the 44687 zip code have died (map below).

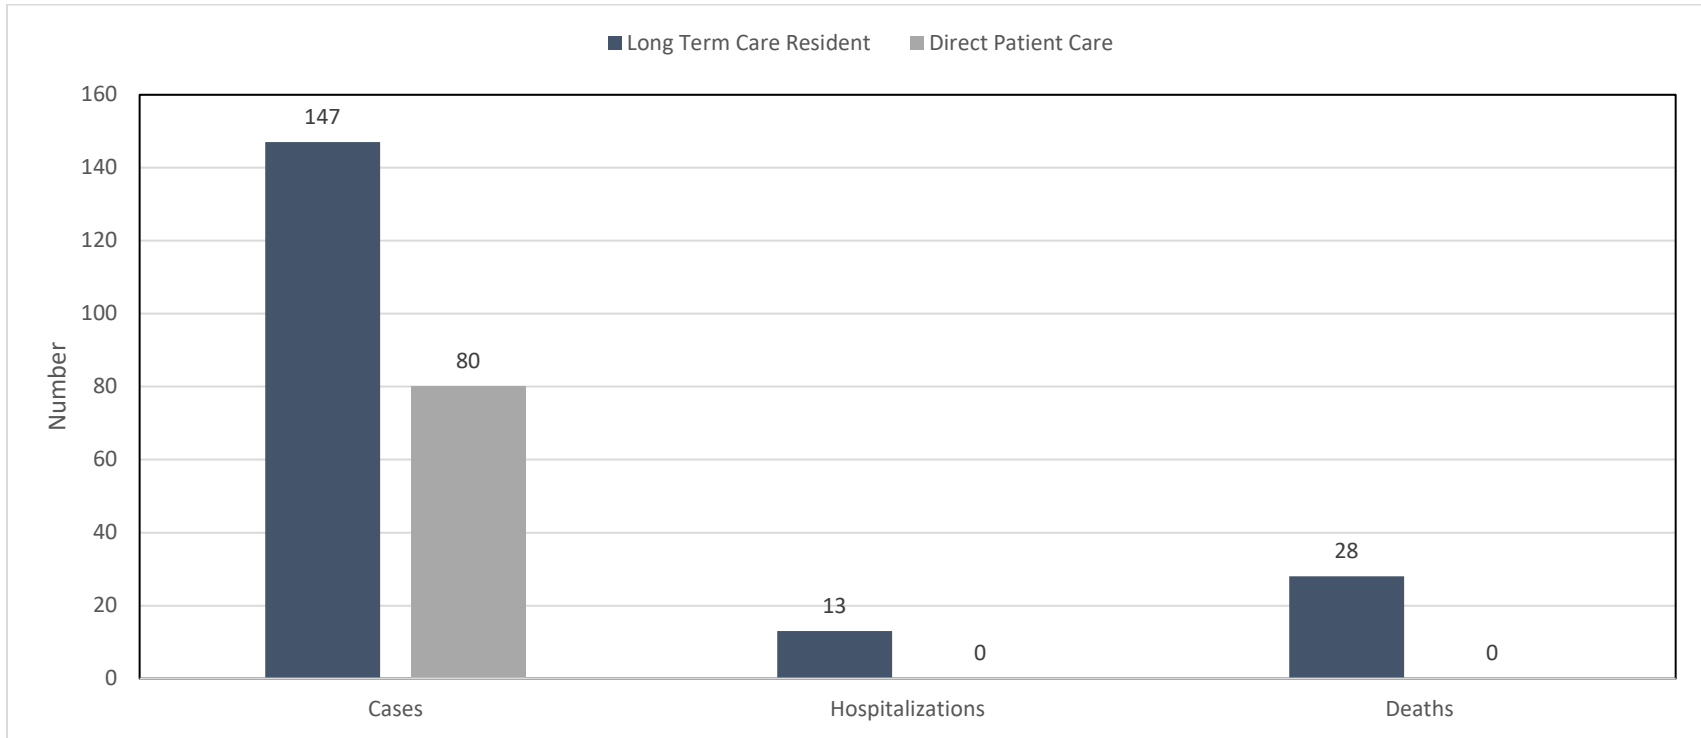

Case Fatality Rates by Age Group:

Case Fatality Rate (CFR) is a measure of disease severity. CFR is calculated by dividing the number of deaths by the number of total cases. The overall CFR for Holmes County is 3.5%. CFR increases from 0% for those ages 0-29 to 18.1% for those age 80 or older.

Long-Term Care Facility Residents and Health Care Professionals:

Long-term care facility residents are a vulnerable population during the Covid-19 pandemic. Since the beginning of the pandemic, 147 cases, 13 hospitalizations, and 28 deaths have been reported among residents of long-term care facilities. The case fatality rate for long-term care residents is 19%. Health care professionals are essential for providing direct patient care. Among these professionals, there have been 80 cases, 0 hospitalizations, and 0 deaths.

Case, Hospitalization, and Death Counts and Rates per 100,000 by Zip Code:

Zip	Village	Population	New Cases (last 4 weeks)	Case Rate per 100,000	Hospitalizations (last 4 weeks)	Hospitalization Rate per 100,000	Cumulative Deaths	Death Rate per 100,000

Data Sources:

1. **Ohio Disease Reporting System (ODRS):** Information on cases of communicable diseases reportable under Ohio Revised Code are housed and maintained by the Ohio Disease Reporting System (ODRS). Corona Virus Disease 2019 (Covid19) is a reportable condition under Ohio Revised Code. Health Care Providers are required to immediately notify their local public health department of Covid19 cases for follow-up. Cases with a classification status of confirmed or probable are included in this report. Confirmed cases are defined as patients that receive a positive laboratory test performed for Covid19. Probable cases must meet clinical criteria and epidemiologic evidence without confirmatory laboratory testing OR meet presumptive laboratory evidence and either clinical criteria or epidemiologic evidence.
2. **Office of Vital Statistics:** The Holmes County General Health District Office of Vital Statistics receives reports on the causes of death that occur within the county. Covid19 deaths were included in this report if they were listed as the immediate or underlying cause of death on the death certificate.
3. **Definition of Recovered:** The number of cases minus the number of deaths minus the number of cases with illness onset in the last 21 days.

Data presented in the report are considered preliminary and subject to change as additional information is gathered.
